

# ADAM ALEXANDER DIAZ LARA

---

## SUMMARY

As a Full Stack Web Developer with a self-driven background, I excel in creating dynamic web applications, including a comprehensive order management system and a personal finance tool, using ASP.NET, Angular, and SQL Server. My expertise in web API development and responsive design, coupled with a knack for intuitive user experiences, showcases my technical proficiency and creative problem-solving skills.

---

## EXPERIENCE

**Full Stack Web Developer, 01/2024 - Current**

**Self - Bani, Peravia**

**ResinArt**

Order Management System: I developed a web application for order management using ASP.NET Core and Angular. I implemented a RESTful API to handle partial and full payments, integrated validations on both the backend and frontend, and designed an intuitive interface to enhance the user experience.

**MyFinances**

Income and Expense Application: I developed a personal finance management system using ASP.NET Web API, Angular, and SQL Server, implementing JWT authentication and the Repository Pattern. The application allows users to record and categorize income and expenses, visualize dynamic statistics with Chart.js, and generate monthly reports for better financial control. I utilized Angular and Bootstrap to create an intuitive and functional interface.

**Portfolio**

A dynamic and professional portfolio website developed with Angular and Bootstrap to showcase my projects and experience. It features a responsive design, smooth navigation, and detailed project descriptions to highlight my expertise in web development.

---

## EDUCATION AND TRAINING

**Bachelor of Science, Computer And Information Sciences, 10/2020**

**UASD - Santo Domingo**

---

## LANGUAGES

## CONTACT

**Address:** Bani, Peravia 94000
